

Simply Blend Valves

Product Overview:

Simply Blend valves provide accurate and sustainable temperature control. They are used to blend water down to an accept temperature to be run through the floor with underfloor heating.

The maximum heat out put the blend valve can support is 14kw. Simply Blend Valves have built in pressure and temperature gauges as standard.

Product Specification

Simply Blend Valve	
Maximum Temperature	85°C
Adjustable Temperature Range	35-60°C
Temp Control Valve	Factory Pre Set 45°C
Connection size	1 ¹ / ₂ " F x 1" M
Connection Elbow	3/4" F x 3/4" M
Boiler F/r Connections	3/4" F
Maximum Static Pressure	10 Bar
